*Your Drug May Be Your Problem*⁵⁵ - How and why to stop taking psychiatric medications. A book written by Peter R. Breggin, M.D. and David Cohen, Ph.D. This is a common sense book written to patients, families, and psychoterapeuts that undestand the toxicity of those psychiatric drugs, discern the psychological and biological spheres, and want to help persons to safely stop the consume of those iatrogenic drugs.

*Brain-Disabling Treatments in Psychiatry*⁵⁶ - A book written by Peter R. Breggin, known as the conscience of American psychiatry. The book, with near 1400 bibliography citations, shows how the drugs, electroshock, and the psychopharmaceutical complex, are disabling the brain of psychiatric patients.

*Articles and Reports Written by Peter Roger Breggin*⁵⁷ - Peter Roger Breggin (born May 11, 1936) is an American psychiatrist and critic of biological psychiatry and psychiatric medication. In his books, he advocates replacing psychiatry's use of drugs and electroconvulsive therapy with humanistic approaches, such as psychotherapy, education, and broader human services. Guru *Nanak*¹⁹ is the Founder of the faith of Sikhism. The Sikh scripture is **Guru Granth**. The book "*It is The Same Light*", the enlightening wisdom of **Sri Guru Granth Sahib (SGGS)**, is an interpretation by *Daljit Singh Jawa* who writes: "The one message, which is both implicit, and explicit in this holy scripture, and which the author particularly wants to share with the rest of the world is that we have been all created by the same one Creator, and '*It is The Same Light*' which pervades in us all. As such, we are the children of the same parent. Therefore, we should all live like brothers and sisters, always loving each other, and our Creator." Download from www.gurbaniwisdom.com²⁰:

*A Synthetic Enamel for Rapid Tooth Repair*¹⁴⁹ - Written by Kazue Yamagishi and others colaborators from Japan. They describe a new dental paste, based in **hydroxyapatite**, that achieves rapid repair of early tooth decay. This article was published by the scientific journal **Nature**.

*Comparison of Chemical Composition of Materials Used in Dental Restorations 8 Years After the Irradiation*¹⁵⁰ - An interesting study about the chemical composition of three types of odontological material: amalgam, resin-based composite and compomer. The chemical elements was analysed in 2001 and in 2009, eight years after. The researchers shown, *in table 1*¹⁵¹, that mercury (Hg) compound 53% of the samples in 2001, and compound 42% in 2009. This is a proof that about 20% of the mercury (Hg), from the odontological fillings of amalgam, effectively vaporized in eight years.

*Kaluza-Klein Gravity*¹⁶² - Written by J. M. Overduin & P. S. Wesson. *Abstract:* We review higher-dimensional unified theories from the general relativity, rather than the particle physics side. Three distinct approaches to the subject are identified and contrasted: compactified, projective and noncompactified. We discuss the cosmological and astrophysical implications of extra dimensions, and conclude that none of the three approaches can be ruled out on observational grounds at the present time.

*Space-Time-Matter: Modern Kaluza-Klein Theory*¹⁶³ - Written by Paul S. Wesson. *Preface:* Einstein endorsed the view of Kaluza, that gravity could be combined with electromagnetism if the dimensionality of the world is extended from 4 to 5. Klein applied this idea to quantum theory, laying a basis for the various modern versions of string theory. Recently, work by a group of researchers has resulted in a coherent formulation of 5D relativity, in which matter in 4D is induced by geometry in 5D. This theory is based on an unrestricted group of 5D coordinate transformations that leads to new solutions and agreement with the classical tests of relativity. This book collects together the main technical results on 5D relativity, and shows how far we can realize Einstein's vision of physics as geometry.

*A Mathematical Theory of Communication*¹⁶⁴ - Written by C. E. Shannon, known as the "father" of information theory. This fundamental paper reunites and expands various important concepts about information in messages that are communicated in a channel. Those concepts and ideas are important not only to build communication systems, but also to design computation systems to receive, process and transmit information. This theory of information is also useful to understand and aspects of the cognitive and neural systems, including artificial
